

# Table of Contents

Contributions are listed in alphabetical order of their titles

A Burden of Wonder.

By *Tinus Strauss*

A Computing Medley on Program Verification, Specification, and Automated Reasoning.

By *John A. van der Poll*

A Means to an End: Getting the Job Done.

By *Gertjan Zwartjes*

An Assertion-Guided Derivation of a Circle Drawing Algorithm.

By *Bruce W. Watson & Derrick G. Kourie*

Deriving the Boyer-Moore-Horspool Algorithm.

By *Loek G. W. A. Cleophas*

Implementation of Deterministic Finite Automata on Parallel Computers.

By *Jan Holub & Stanislav Štekr*

Improving Architectural Design Decisions.

By *Andrew B. Boake*

Mobile Spectrum Auctions.

By *Vali Lalioti*

Modelling your Domain using Ontologies.

By *Thomas Meyer*

Musings about Text Redundancy and Text Compression.

By *Stefan Gruner*

Querying Large C and C++ Code Bases: The Open Approach.

By *Alexandru Telea & Heorhiy Byelas*

Random Generation of Unary Finite Automata over the Domain of Regular Languages.  
By *Lynette van Zijl & Lesley Raitt*

Reflections on Coding Standards in Tertiary Computer Science Education.  
By *Vreda Pieterse & Derrick G. Kourie*

Software and Inventive Ideation.  
By *Marlene Ross*

Software Engineering Professionalism.  
By *W.H. Markel Theunissen*

The Ethical Researcher.  
By *Dewald Roode*

The Lazy Programmer.  
By *Judith Bishop*

The Values of the Myths of Postgraduate Studies in Computer Science.  
By *Martin S. Olivier*

Verifying the Uniform Candy Distribution Puzzle with CSP-Prover.  
By *Yoshinao Isobe & Markus Roggenbach*

Web-Based Development: Putting Practice into Theory.  
By *Iwan Vosloo*
